

# Southwest Florida Regional Student Voice Report 2018

## Why are we doing this project?

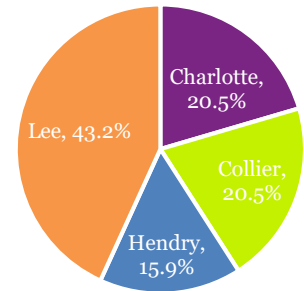

To understand students' attitudes and perceptions  
about their community and education

## Regional Summit Participants

# 44

Students participated in a regional  
summit to share their thoughts

## What we learned

Students overall have a positive  
view of their community

Students see violence  
going on

Time, pace, workload are  
challenges in life and education

Students would like to  
see more personal  
responsibility from  
themselves

Young people are  
challenged in making the  
right career path choice

Students want to  
know that their  
teachers care and  
respect them

Students disciplined frequently for  
fighting and being disrespectful are  
negatively perceived by peers and teachers

Students get most of  
their career information  
from family

"We ourselves are responsible  
to step up and be the voice  
that creates change because  
if we don't then who will"  
-Student Response
